

Shopist Documentation (v2.2)

This is very easy and fully customizable eCommerce for laravel. The main feature and difference of other eCommerce with the custom products designer. It's unique from others. Installation very easy. Please read carefully installation process.

Installation

Server Requirements:-

1. PHP >= 5.6.4
2. OpenSSL PHP Extension
3. PDO PHP Extension
4. Mbstring PHP Extension
5. Tokenizer PHP Extension
6. PHP Fileinfo extension enable from php.ini

Shopist Installation Process:-

Shopist installation is very easy. Please follow the instruction.

1. Unzip the shopist folder.
2. Copy all files from shopist folder to your server **OR**

If you upload with shopist folder like (www.example.com/shopist/ or www.example.com/anyname/), then change the index.php file from root with the below content

- Find
`require __DIR__.'../bootstrap/autoload.php';`

and change with the

`require __DIR__.'../shopist/bootstrap/autoload.php';`

OR

- Find
`$app = require_once __DIR__.'../bootstrap/app.php';`

and change with the

```
$app = require_once __DIR__.'../shopist/bootstrap/app.php';
```

OR

```
$app = require_once __DIR__.'../anyname/bootstrap/app.php';
```

3. Open .env file add change DB_HOST, DB_DATABASE, DB_USERNAME, DB_PASSWORD with your server DB information. You must change NOCAPTCHA_SECRET and NOCAPTCHA_SITEKEY.

Those are for login security. To **Get google recaptcha site key and secret-key** go <https://www.google.com/recaptcha/admin>.

```
NOCAPTCHA_SECRET=[secret-key]  
NOCAPTCHA_SITEKEY=[site-key]
```

4. Then hit from your browser with your url like (www.example.com/ (if your url just like this) or [www.example.com/shopist/\(if your url just like this\) or www.example.com/anyname/](http://www.example.com/shopist/(if your url just like this) or www.example.com/anyname/) (if your url just like this))
5. After hit, your url will display admin information form, which is your admin login information.

Just finish your installation.

Shopist admin url :-

www.example.com/admin/login or www.example.com/shopist/admin/login or www.example.com/anyname/admin/login

Shopist frontend url :-

www.example.com/ or www.example.com/shopist or www.example.com/anyname

Custom Design ☒ Enable as a custom design product

Create Custom Design Dimension and Upload Design Product:-

First ensure your design dimension and add your design product that the end user can design from the frontend. Follow the screenshot

The screenshot displays a product design interface. At the top, the 'Product Type' is set to 'Customizable Product'. Below this, there are tabs for 'General', 'Inventory', 'Features', 'Advanced', 'Attributes', and 'Variations'. The 'General' tab is active, showing 'Edit Design Elements' and 'Create Layout' buttons.

The 'Canvas Size' section is highlighted with a red box. It contains three sections for different device dimensions:

- Small Devices Dimension (<= 500)**: Width and Height input fields.
- Medium Devices Dimension (>= 501 && <= 768)**: Width and Height input fields.
- Large Devices Dimension (>= 769)**: Width and Height input fields.

A red arrow points from the text 'Ensure your design panel dimension' to the 'Canvas Size' section.

Below the canvas size settings, there is a 'Create more design element' button, also highlighted with a red box. A red arrow points from the text 'Add design side' to this button.

The bottom section shows a 'Front' view of a product (a black t-shirt) with a design upload area. It includes a 'Upload Design Image' button, a 'Remove Image' button, and a 'Upload Design Title Icon' button. A 'Back' button is at the bottom left.

Create Custom design Layout:-

Create your design layout for the end user. Follow the screenshot

Localization:

1. Please upload zip file from admin settings->languages. You can download sample zip file from there
